LOMOND, ALBERTA, FRIDAY, MAY 28, 1920

\$1.00 PER YEAR.

ALBERTA NEEDS RAIN

While There is Plenty of Sub-surface Moisture, the Crops Damaged by Violent Winds Require Surface Moisture to Nurse Them Through.

This week's weather conditions have been everything but encouraging to the farmer. Sometimes we are led to believe that there is more than the government working against the best interests of the farmer. It would be a safe estimate to say that at least forty per cent of the acreage now seeded is badly infested with the cut worms or is badly hammered or blown out by the high speed winds that have visited the West with remarkable frequency during the past couple of weeks.

o o o

There are several species of worms at work in the fields, the predominant one being the hard yellow wire worm. He is a hard cutter and when he passes over the land he makes a complete job of harvesting the crop. The other varieties eat closer to the surface and apparently do not attack the kernel. With early rains a good deal of grain so eaten will come along.

o o o

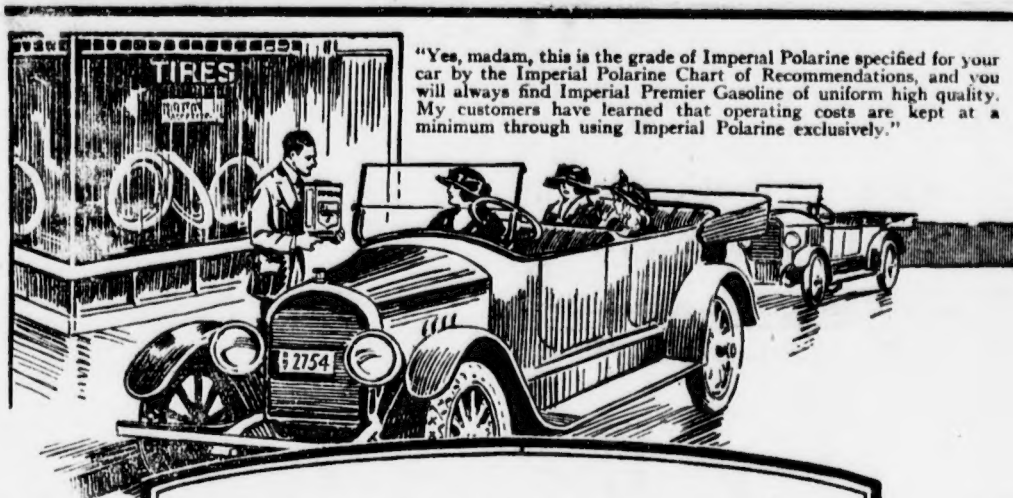

With regard to the prospective rains no one appears to be able to do more than guess about it. We are risking twenty cents to be spent at Dad Cox's emporium if a real rain does not hit here by eleven o'clock on Wednesday, June 2nd.

HOW TO CALCULATE YOUR INCOME TAX

(Boston Herald)

First., take your income,
Add wife's income,
Divide by yours eldest son's age,
Add your telephone number,
Subtract your auto license number,
Add electric light bill,
Divide by the number of kilowatts,
Multiply by your father's age,
Add number of gold filings in your teeth,
Add your house number,
Subtract your wife's age (approximately),
Divide by the number of aunts you have,
Subtract the number of daughters,
Multiply by the number of times you have gone up in an airplane,
Subtract your best golf score,
Add a pinch of salt,
And then go out and
Borrow the money and pay the tax.

Inadvertantly the amount of Elliott, Argue & Co's subscription was omitted from the Neil Currie fund list printed in last issue. \$5.00.

"Yes, madam, this is the grade of Imperial Polarine specified for your car by the Imperial Polarine Chart of Recommendations, and you will always find Imperial Premier Gasoline of uniform high quality. My customers have learned that operating costs are kept at a minimum through using Imperial Polarine exclusively."

Reduced Operating Costs

IMPERIAL Polarine reduces automobile operating costs in many ways. By providing a piston-to-cylinder seal which assures maximum power. It helps to save friction waste in every moving part, keeps the engine running smoothly and out of the repair shop and minimizes depreciation.

Imperial Polarine prevents friction by coating every wearing surface with a heat and wear-resisting oil film. It seals all the power in the piston chamber. Imperial Polarine gives correct lubrication to every part of your car.

One of the three grades described below is specially suited to your motor. Look for the Imperial Polarine Chart of Recommendations when you buy oil and learn which grade to use.

Imperial Polarine is sold in sealed gallon and four-gallon cans, 12½-gallon steel kegs, steel half-barrels and barrels, by dealers everywhere. There is an appreciable saving in buying half-barrels and barrels.

IMPERIAL POLARINE (Light medium body) IMPERIAL POLARINE HEAVY (Medium heavy body) IMPERIAL POLARINE A (Extra heavy body)

Results of Tests in Raising Potatoes

Last season was such a disastrous one regarding the potato crop in Alberta that the following article from an experimental farms official regarding tests which have been made is particularly timely at this season of the year.

In attempting to lower the high cost of living some consideration should be given to increasing the supply of potatoes. This crop is one of the most universally used as well as one that can be the most rapidly increased of all the crops that are grown for human consumption.

In the Prairie Provinces four factors play an important part in decreasing the returns from the potato crop—these are a short growing season, insufficient rainfall, shortage of labor and lack of storage facilities.

The short growing season can be lengthened by planting earlier in the spring than is commonly practised. At the Scott experimental station potatoes planted on May 8th have during a five year period, gave an average yield of 20 bushels per acre over potatoes planted on May 29th. Since potatoes planted early may be frozen down by the spring frosts it is important to use large-sized sets in order to supply plant food to carry the plant through adverse weather conditions. In the tests, tubers having three eyes have yielded 31 bushels more per acre than where sets were cut down to one eye. Hastening the growth of the potatoes by developing green sprouts before planting has in some measure overcome the handicap caused by the short season. Tubers sprouted in a warm light room have shown, on an average, an increase of 46 bushels per acre over potatoes that had no sprouts developed before planting.

Medium to early maturing varieties will, especially in the northern districts more nearly ripen and will make superior potatoes for table use than will late maturing sorts that have to be harvested green. At Scot, Wee MacGregor is the leading medium-season potato. Of the early maturing sorts Early Rose strains such as Early Northern, Rochester Rose and Everitt are at the top of the list. Irish Cobbler has proven one of the best early white sorts from the standpoints of yield and cooking quality.

In districts where early autumn frosts

prevail, hilling will aid in protecting the tubers from light frosts. In dry seasons the soil moisture is conserved if only level cultivation is given.

In order to ensure sufficient moisture in districts with light rainfall the potato crop should be planted on well fallowed land and the sets dropped not closer than 14 inches apart in the rows. The importance of working the land down as rapidly as it is planted is of vital importance as frequently considerable moisture is lost by delaying the operation necessary to accomplish this. Frequent shallow cultivation throughout the season will aid in decreasing evaporation.

The experiments to determine the cost of producing potatoes have shown that potatoes can be grown profitably where all the labor has to be hired. Each year for the past five seasons an acre plot of potatoes has been grown on the Station in order to determine the profitableness of potato growing. The following figures are the averages of the costs and returns for that period. Value of crop per acre \$117.12, average cost \$47.12. Profit per acre \$42.40. The cost included rent, seed, labor, use of machinery, etc. The average selling price at time of harvesting has been 71c per bushel and fluctuated from 40c to \$1.25 per bushel.

It is frequently found necessary in potato growing to have some winter storage space. The Dominion Experimental Farms Circular No. 71 describes a plan of a root cellar that is used by a number of farmers for keeping potatoes over winter.—Milton Tinline, Superintendent, Experimental Station, Scott, Sask.

How Billiards Originated

Billiards is supposed to have originated in England. There was a linen draper living in London who sometimes found time hang heavily on his hands. In these days cloth was measured with yard sticks. This gentleman whose first name was William popularly abbreviated to Bill, used to play on his counter with empty spools, using his yard stick as a cue. These yard sticks became known as "Bill's yards," hence the modern name of billiards.

A Speech on Teaching

(By Dr. Frank Crane)

I have just read a remarkable speech. Once in a blue moon you find one. This one contained neither buncombe nor bromide.

It was by a school teacher named Slutz, and gave his ideas on teaching. It was so good that John H. Patterson had it printed as an advertisement in his cash-register bulletin. "All of us are teachers," said Patterson. "Selling is teaching. Propaganda is teaching."

Slutz's school is at Moraine Park, Dayton, Ohio. It is in a converted greenhouse, and is sometimes called "the school in the glass house." Not bad idea. There have been enough schools in mausoleums.

Slutz's speech was made a la school teacher, that is to say, when he got through you knew what he had been talking about. He made seven points, each of which was sharp. It was not a concatenation of catch phrases. I have worked at the speech-math trade a long while myself, and know a good job when I see it.

Here are his seven points, every one a dum-dum:

1—The school ought to develop individuality rather than conformity. How pleased we are when our children learn to conform! Yet the whole hope of amounting to anything is based on their non-conforming power.

2—The school should develop optimism. This is the best American characteristic, the blithe courage to tackle

anything, the specializing in the impossible.

3—The school ought to teach how to play. Nine-tenths of all a boy or girl learns comes by play.

4—The school should encourage many-sidedness. There is a democracy also in ideas. In a land of specialists the all round man is king.

5—The school should develop business shrewdness. We are a nation of business men. It is the era of business. The mind that despises it belongs to an other century. No poet or painter is degraded by having business sense.

6—The school should teach self-government. Every high school graduate ought to be an expert politician. Democracy is politics. A nation that despises politics is fit only to be bossed by a kaiser. Self-government is more important than arithmetic.

7—The school should develop the spiritualities. Because spirituality (not church, creed, organization, formula, fanaticism) is the only hope of the world.

Every one of these points bristles with brains radiates suggestiveness.

The speech is so good that I shall steal it. And a greater compliment I cannot pay.

.. LOCALETS ..

Victoria Day (Monday) served the very pleasant purpose of allowing all the young and hopeful to re-establish the bonds of affection. Those who could not accomplish the desired end by staying home journeyed abroad. The town was quite deserted and the holiday was quite faithfully kept by the merchants.

Mr. and Mrs. F. M. Anderson of Vulcan were the guests of Mr. and Mrs. R. L. King over the holiday.

Mr. MacLeod, who was but recently moved to Taber, came back to see that he had left everything all right.

The last we saw of Tommy he was heading south in the meat wagon.

Mr. and Mrs. H. E. Branscombe of Travers went through to Okotoks in their new model Ford.

C. H. St. John has fallen a victim to one of Henry Ford's latest.

Do your hens lay? If so, how often? Do they pay? If so, what are your dividends? Or are you ignorant of their individual abilities like as we are? Chances are your intelligence is pretty much on a par with ours on this particular score. But there is no reason why we should all remain blind, for the Agricultural Society is having a poultry expert here on Tuesday evening, June 1st, to elucidate some of the simple facts that have been discovered after exhaustive tests in the government experimental stations. Again we

refer to the excellent work that was done at Vulcan, and besides the mere fact of providing the information it has been the means of stimulating the interest in poultry raising. The address will be given in the church commencing at eight o'clock.

Enchant is holding a big base ball celebration on Thursday, June 3rd., the Kings' birthday. There will be girls' basket ball, junior base ball and two senior base ball games in the afternoon. Enchant, Turrin and Lomond playing. There will be the usual big dance at night with special orchestra.

Mrs. Jas. E. Blake is holding an auction sale of her household furniture at the McClung farm, one and a half miles north of town on Saturday afternoon, June 5th.

When it comes to real live organization you have got to hand it to the Enchant U.F.A. their latest move is to secure the services of President H. W. Wood to speak at Enchant on Tuesday evening June 15th. Other speakers will also be present. Several from Lomond and Travers who are interested in the latest political moves of the Farmers Party have signified their intention to be present.

Father Bidault of Lethbridge is in town and mass will be celebrated in the hall on Sunday.

We shall have to get Luther Burbank the graft some rain into these wind storms that come across here.

Thursday, June 3rd, the King's birthday is a legal holiday.

Furnish Your Kitchen with Aluminum

When buying value you cannot do better than pay a little more money on the start and furnish your kitchen with aluminum utensils. They will outwear any other kind and be the source of more satisfaction.

Experimental Farms Report

Almost every farmer in Canada is interested in some phase of the agricultural work carried on by the Dominion Experimental Farms System both at Ottawa and on the twenty branch farms distributed between the Atlantic and the Pacific. The work covered on these farms includes investigations with live stock, field crops, fruit growing, tobacco, bees, poultry and, in fact all branches of agriculture adapted to Canadian conditions. The report of the Dominion Experimental Farms for the Fiscal Year 1919 is obtainable from the Publications Branch, Department of Agriculture, Ottawa. This report records many valuable and interesting experiments that are under way. Among these are experiments in feeding live stock for market, and summer and winter experiments in fattening swine; the Bee Division gives a preliminary report of its experiments with two queens in one hive, and in the Division of Economic Fibre Production the variety test and the prairie flax straw experiments are outlined. Throughout this publication there are many valuable conclusions stated which are based on the experimental work conducted at these farms.

Some of France's War Losses

Paris, May 20.—What is perhaps the first concise and comprehensive statement of France's war losses has just been made by Captain Andre Tardieu. In describing what he calls "the balance sheet," of France. Captain Tardieu states that during the five years of war eight million men were mobilized of whom 1,400,000 were killed, 800,000 maimed and 300,000 wounded. France thus lost 57 percent of her men under 32 years of age.

Concerning material losses Captain Tardieu states that six hundred thousand houses were destroyed, 75,000,000 acres of arable land laid waste, 3,000 miles of railroad and 25,000 miles of highways destroyed. Mines which produced 55 percent of France's total coal output were damaged or destroyed; 11,500 factories which before the war produced 95 percent of the wollen goods, 90 percent of the linen material, 70 percent of the sugar, and 60 percent of the cotton goods were crippled.

One-third of France's ships were sunk by German submarines. To defray the cost of munitions of war and food supplies, France had to raise more than eight billion francs, of which sum she was forced to lend 1,320,000,000 to foreign countries.

Revolutions are still the style in Mexico.

Minutes of Clifton's Council May Meeting

A meeting of the council of the Municipal District of Clifton was held in the municipal office on Saturday, May 22nd., there being present I. Hobberstad, F. Earl, F. Hardy, G. Hornberger, E. R. Barnett, with the reeve, Jos. Rodgers, in the chair.

Minutes of the previous meeting were read and approved.

Letter from the Department re Rural Credits was read, and it was moved by F. Earl that same be tabled until such time as council is asked to assist in forming such society.

Letter from W. H. Sellar, solicitor, re part of S. W. 1/4 12-15-20 containing the spring was read and after some discussion it was moved by Rodgers that the whole matter be tabled, the resulting vote was Rodgers, Hardy and Hobberstad for, and Earl, Hornberger and Barnett against. Motion lost.

Moved by Earl that amount of \$700 for the well be appropriated from taxes from division two in lieu of roadwork, but on discussion this motion was withdrawn.

Moved by Hardy that matter be tabled till next meeting.

Letter was read from J. J. Brodie of Travers re road work, passing without comment.

Letter was read from the Canada Land and Irrigation Co. re water for irrigation purposes on lands adjacent to the ditch and same was handed to councillors of divisions interested. (For the benefit of outsiders interested, the company is ready to contract to supply water at about the same financial basis as estimated for the Lethbridge Northern project).

Moved by Barnett that application for surveys by the Department of public works be cancelled.

Moved by Barnett that W. C. Maronda be tendered \$25 an acre for two acres expropriated off the S. E. 1/4 22-16-20 for road purposes.

Moved by Earl that seed grain bylaw be amended so as to increase amount of same from \$75,000 to \$100,000. Same received its first, second and third readings and was duly passed.

Moved by Rodgers that letter from the Department of Public Works regarding lease of roadway by W. Pleasants be tabled till next meeting and that Councillor Hornberger look into the matter in the interval.

Moved by Barnett that the application of L. C. Jackson for lease of roadway be tabled till next meeting, pending report from Reeve Rodgers.

Petition for the continuation of Lomond new road running east was presented to the Council, but after discussion a motion by Hobberstad tabled the matter.

Moved by Barnett that the secretary communicate with the superintendent of the Dependent and Delinquent Children's Department regarding the widow's pension payable to Mrs. Agnes Ainlay.

Moved by E. R. Barnett that balance of road work due to Guess Ranch for 1919 be tabled till next meeting, pending report from ex-councillor Bly.

Moved by Earl that G. M. King be allowed to set his fence on the north line of the N. W. 1/4 4-15-19 back two rods north and D. Nichols be notified to move his fence on the south line of the S. W. 1/4 9-15-19 two rods further

Mr. Farmer . . .

When you purchase stock or machinery you are satisfied to pay more for the best. Why not use the same good judgment when placing insurance on your growing crops? We can still sell you the best protection at the same price you pay other agents for the poorest.

Adjournment.

Departmental Examination Dates

Departmental Examinations for Grades eight, nine, ten, eleven and twelve will be held this year on June 21st, 22nd, 23rd, 24th, 25th, 28th, 29th, and 30th at Lomond.

The Department will supply the re-

quired foolscap, drawing paper, blotting paper and squared paper, but candidates shall provide themselves with rulers, compasses, pen, etc., also ink in districts where it is not supplied by the school board. Candidates writing on the examinations in Drawing must provide themselves with a soft eraser, a good drawing pencil, ruler, India ink, water colors and suitable brush or brushes. For the work in water color, a supply of water and convenience for cleansing the brushes should be available.

Candidates should advise the board at once at which centre they desire to write.

The examinations for the First and Second Year Commercial Course will be conducted at Calgary, Edmonton, Lethbridge and Medicine Hat, during the same period as the grade examinations.

Water Turned Canada Land & Irrigation Co. Ditch System

Water was turned into the main canal of the Canada Land and Irrigation company east of the Little Bow reservoir, and is now flowing east to the irrigated farms in the Vauxhall district, where 5,000 acres of the company's lands, which have been taken over by settlers from the States, will be put into crop this year. The water will be ready for use on the farms.

The water is now running through the ditch around the Little Bow cut-bank where some trouble has been an-

ticipated, but there is now no indications of any difficulty, and the company expects that there will be none.

Water was turned into the main ditch from the Bow River intake, 40 miles east of Calgary, a year ago last fall, and since then the huge reservoir in the Snake valley, known as Lake McGregor, which is nine miles long and holds enough water to run the entire project for a year, has been filled. Some weeks ago water was turned from this reservoir into the main ditch to the east and the reservoir at Little Bow, which holds enough for a month's operations, was filled. Now the water has been turned out into the ditches from this reservoir.

The turning of the water into the ditches marks the successful culmination of an engineering project which has been in course of development for a number of years. It is ten years or more since the project was first undertaken, and since then it has been through various reorganizations and changes, until it culminated in the amalgamation of three distinct companies into the Canada Land and Irrigation company. The main ditch of the project is 176 miles long, and from this it is ultimately planned to irrigate 220,000 acres of land—Brooks Bulletin.

Mr. and Mrs. H. E. Elves were over to Vulcan for the holiday.

Luck Was With Lomond Boys in First Game of Season

The base ball season was opened in Lomond today by the visitation of the Enchant team. No one expected to see any great exhibition of the game for the season has been very much against the organization and practice of the boys. Nothing has seemed settled and no one seemed to know when and where to move next. The fact that Lomond won by a score eight to three gives The Duke a little background to smile against.

The game was rather late in starting, which is not a fault entirely new to the Lomond diamond. Some of the visiting team was a little late in arriving, and, Enchant, like Lomond, is suffering seriously from the lack of a proper round-up. Pat Connolly in the capacity of referee finally got the boys going and those who were calloused enough not to allow the high wind to interfere with their interest in the game found plenty to root at. Tommy scored for Lomond in the first innings, Enchant scored their entire three runs in the third innings and that time looked like getting the best of the money. Chapman came up with a score in the fourth, Ward and Barber each scored in the fifth, Barber again in the seventh, and Cox, Claude Blake and Barber completing the score in the eighth. The boys showed a good deal of pep. Indeed they were a pleasant surprise to the fans. As they play at the Enchant celebration on June 3rd, they are sure to have a solid following.

Lomond.	Enchant:
S. Ward.	Shand.
D. Thompson.	McCann.
T. Chapman.	Burns.
Mansfield.	Spezer.

I. Cox.	Banks.
Claude Blake	Whitting.
O. Barber.	Paulson.
E. Thompson.	Hang.

o o o

The card party and dance in the hall at night was as much of a success as the game. The place was filled to the last niche of capacity. Constable Maddison and Mrs. Perrin were winners in the Five Hundred drive, Tom Chrpman and Miss. Ryall came out victorious in

the Whist Drive.

Music for the dance was provided by Mrs. Maddison at the piano with Mr. Salter at the drums.

o o o

The Ball Club desires to thank all those who assisted in making the affair a success, not forgetting the Boy Scouts who decorated themselves in their new uniforms for the occasion. The receipts totalled \$156.25.

Manager Armstrong wishes to publicly thank Bob Plunkett for his effort at the stump speech.
